Sliding Patio Doors provide an elegant entryway to any home. Available in 5, 6, 8, 9, and 12 foot sizes, our doors provide superior insulating values to typical doors. We fill the chambers of the door frames with open-cell polyurethane foam (similar to the insulation in a refrigerator door) for maximum insulation. Additional standard features include 1" sealed, double strength, double pane thermal glass units, galvanized steel reinforcement in the sashes for superior strength, strong zinc plated steel tandem rollers providing years of smooth, silent operation, interlocking panels with full length weather stripping and powder coated handles.

**Frame R Values**

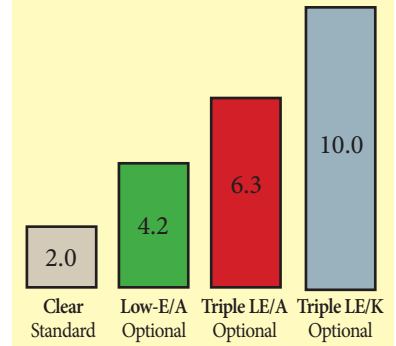

Optional Features include Low-E glass with argon or krypton gas, spot free glass with no dry technology, brass handles, standard colonial or premium heritage grids, key-lock entry hardware for added security, and custom sized units that are our specialty. Additional options available.

**Glass U-Values  
(Lower better)**

**Glass R-Values  
(Higher better)**

**GENESEE VALLEY WINDOW** has been producing premium vinyl windows since 1991. We offer a wide range of products including windows, doors, bays, gardens, casements, awnings, new constructions applications and shapes. As noted above, our products meet or exceed all industry guidelines in terms of performance, giving you a product built to last a lifetime and backed up by a written warranty to this effect. Our management team has over 100 years of experience in the vinyl window industry providing you insurance that all of our products are produced using the strictest quality standards.
